B

Installing the HPKV Key Valve into Your Urinal

Diameter of Urinal Hole

Diameter of 50mm +/-1.5 mm

The ideal hole diameter to accommodate the Key-Adapter is 50mm.

Drain Profile

A Continuous contour

A curved drain surface prevents liquid residue from forming between the bowl drain and the Key-Adapter.

Installation

Installing the Key-Adapter Valve

Our HPKV and Key-Adapter valve may require a rubber gasket to help ensure the urinal drain is sealed.

The Adapter-Key was designed to be tightened by hand without the help of other tools.

There is no reason for any urinal to smell, regardless of whether it is a waterless one or a conventionally flushed urinal.
